Order:

Order History
- url:/api/vı/orders/history
- type:GET
- parameter:{start:datetime,end:datetime}
- return:
  {result:integer,content:{orders:[{id:string,created_at:string,remark:string}]}

Order Detail
- url:/api/vı/orders/detail
- type:GET
- parameter:{id:string}
- return:

{result:integer,content:{order_items:[{id:string,order_id:string,location_id:string,whouse_id:string,source:string,source_id:string,part_id:string,box_quantity:integer,quantity:string,is_emergency:boolean,position:string,uniq_id:string}]}}

Create Order
- url:/api/vı/orders/
- type: POST
- parameter:
  {order:{source_id:string},order_items:[{department:string,part_id:string,quantity:string,is_emergency:boolean}],no_part_items:[{department:string,part_id:string,quantity:string,is_emergency:boolean}]}
- return:
  {result:integer,content:{id:string,created_at:string}}

Delete Order
- url:/api/vı/orders/
- type: DELETE
- parameter:{id:string}
- return:
  {result:integer,content:string}

Check Order part
- url:/api/vı/orders/check_part
- type:GET
- parameter:{department:string,part_id:string,count:integer}
- return:

//返回的 **order_items** 数组中,只有包含 **part_id** 的 **item**,其他不返回,**count** 表示最多显示的 **order** 个数.

{result:integer,content:[{order_id:string,created_at:timestring,order_items:[{id:string,part_id:string,box_quantity:integer,quantity:float,is_emergency:bool}]}]}

OrderItem:

Verify OrderItem
- url:/api/vı/order_items/verify
- type:POST
- parameter:{department:string,part_id:string,quantity:string}
- return:

{result:integer,error_code:integer,content:{id:string,order_id:string,location_id:string,whous

e_id:string,source:string,source_id:string,part_id:string,box_quantity:integer,quantity:string, position:string,uniq_id:string}}

Delete OrderItem
- url:/api/v1/order_items/
- type:DELETE
- parameter:

{id:string}
- return:

{result:integer,content:string}

OrderItem Detail
- url:/api/v1/order_item/detail
- type:GET
- parameter:{id:string}
- return:

{return:integer,content:{id:string,order_id:string,location_id:string,whouse_id:string,source:string,source_id:string,user_id:string,part_id:string,part_type_id:string,quantity:string}}

Update OrderItem
- url:/api/v1/order_items/:id
- type:update
- parameter:{department:string,part_id:string,quantity:string,is_emergency:boolean}
- return:

{return:integer,content:{id:string,order_id:string,location_id:string,whouse_id:string,source_id:string,user_id:string,part_id:string,part_type_id:string,quantity:string}}
